

CONTENTS

Preface	7
Chapter 1. Theoretical aspects of applied statistics	11
1.1. Random variables and their characteristics	11
1.2. Main parametric and criterial statistic models.....	24
1.3. Methods of statistical analysis	48
1.4. Pseudorandom numbers with “reference” distribution for imitation modeling	53
Chapter 2. Statistical methods of analysis and processing of experimental results	56
2.1. Theoretical aspects of applied statistics	56
2.2. Checking criterias for statistical hypotheses of normal distribution.....	96
2.3. Two-dimensional statistical model and correlation relationships between its parameters	123
2.4. Statistical methods of establishing of correlation relationship	129
2.5. Methods of statistical optimization	153
Chapter 3. Statistical simulation of physical and technical systems.	
Monte-Carlo method	166
3.1. Metropolis and Monte-Carlo methods of statistical simulation.....	168
3.2. Integration using Monte-Carlo method	182
3.3. Streams of sequential events.....	191
3.4. Modeling of streams in queuing systems	194
3.5. Modeling of processes stochastic systems	209
3.6. Wavelet analysis of noisy signals	252
3.7. Modeling of fluctuations in equilibrium system	256
3.8. Statistical modeling of dinamic noises in MEMS	272
3.9. Modeling patterns of scattering of photons in turbid media.....	276
3.10. Simulation modeling of nanosystems	293
References	313
Appendix	
1. Kosobutskyy P. Lviv mathematician Stanislav Ulam – Founder of Monte-Carlo statistical simulation method (Lviv Polytechnic National University, Lviv, Ukraine)	319
2. Kosobutskyy P. Monte-Carlo modeling of surface atomic diffusion process with MathCAD (Lviv Polytechnic National University, Lviv, Ukraine)	322
3. Seteikin A. Simulation of laser radiation propagation in heterogeneous issues with complex geometry (Amur State University, Blagoveshchensk, Russia. L. Kwangwoon University, Seoul, Korea).....	332
4. Kalyagina N, Savelljeva T. Modeling of laser radiation distribution on the surface of the biological environments (Prokhorov General Physics Institute of Russian Academy of Sciences, Moscow, Russia).....	350
5. Dorozhovets M. Application of Monte-Carlo Method in Instrumentation and Metrology (Lviv Polytechnic National University, Lviv, Ukraine).....	376
6. Trukhan S. Monte-Carlo simulation of diffusion. The diffusion of atoms on a solid surface (Boreskov Institute of Catalysis, Novosibirsk State University, Novosibirsk, Russia).....	395
