ABBREVIATIONS	9
INTRODUCTION	13
Chapter 1. RESEARCH METHODS OF MODERN GEODYNAMICS PROCESSES	17
1.1. Geodetic and geological and geophysical methods of modern geodynamic processes research...	18
1.2. Modern models of tectonic plates geodynamic	26
Chapter 2. TECTONICS AND FORMATION OF NAPE – FOLDED STRUCTURE OF UKRAINIAN CARPATHIANS	34
2.1. Historical aspects of geological structure and evolution of the studied region	35
2.2. Theoretical statements and terms of terrain analysis.....	39
2.3. Main features of geological structure of Carpathians region	43
2.4. Terrain analysis of Carpathians.....	53
2.5. Flysch Carpathians – ancient accretion prism.....	58
2.6. Tectonic zoning of Ukrainian Carpathians.....	62
2.7. Geological evolution of Ukrainian Carpathians	69
Chapter 3. MONITORING OF THE VERTICAL MOVEMENTS OF THE EARTH CRUST OF EUROPEAN REGION BASED ON GEODETIC DATA	83
3.1. Modern vertical movements of the Earth crust in the Eastern Europe area	83
3.2. Results of the precise repeat leveling in the Carpathian region.....	94
3.3. Mapping of the velocity gradients of the vertical Earth crust movements based on repeat leveling data – methodological aspects.....	98
3.4. Investigations of the Earth crust modern vertical movements features based on permanent GNSS station measurements in Central Europe.....	103
3.5. Investigations of relationship between seismic activity and vertical displacements of the Earth crust in Europe	118
3.6. Investigations of variations of high-altitude positioning of permanents GNSS stations in Europe	139
Chapter 4. MODERN HORIZONTAL EARTH CRUST MOVEMENTS IN EUROPE, THEIR RELATIONS WITH SEISMIC ACTIVITY AND SPATIAL GEODYNAMIC MODEL OF CARPATHIAN-BALKANIAN REGION	164
4.1. Modern horizontal movements and deformations of the Earth crust in Carpathian-Balkanian region and Central Europe	164
4.2. Investigations of the influence of GNSS network density to distribution of the Earth crust dilatation based on GNSS data 1992–2008 yy	174
4.3. Computations of horizontal movement’s velocities of the Earth crust based on EPN network data(2000–2010 yy.)	185
4.4. Results of determination of the horizontal deformations of the Earth crust based on GNSS measurements and their relation to the tectonic structure.....	199
4.5. Spatial geodynamic model of the modern Earth crust movements in Carpathian-Balkanian region based on GNSS measurements and geological-geophysical data.....	210

4.6. Investigations of relationships between the horizontal deformations and regional seismicity in Europe	219
4.7. Determination of the correlations between the horizontal deformations velocities and Vrancea's zone seismic parameters	225
Chapter 5. SEISMICITY OF THE UKRAINIAN CARPATHIAN AND ADJUSTING TERRITORIES	238
5.1. Seismicity overview in Carpathian region	238
5.2. Carpathian foredeep seismicity.....	246
5.3. Seismicity in Bukovyna.....	249
5.4. Transcarpathian seismicity	250
Chapter 6. GEOTHERMIC CONDITIONS IN THE CARPATHIAN REGION AS REFLECTION OF ITS GEODYNAMIC EVOLVEMENT	260
6.1. Features of thermal field.....	261
6.2. Geology-geophysical thermal field analysis.....	264
6.3. Geothermal and volcanic activity	271
6.4. Peculiarities of thermal evolution and recent geothermal model of the lithosphere	274
6.5. Lithosphere depth in Carpathian area	283
6.6. Geothermal regime and geodynamic processes	285
Chapter 7. ELECTRIC CONDUCTIVITY ANOMALIES IN THE CENTRAL EUROPE	288
7.1. Methodology of geoelectric investigations.....	289
7.2. Electric conductivity anomalies in the Carpathians region based on GDS and MTS data	292
7.3. Correlation of crustal electric conductivity anomalies and seismicity	313
7.4. The conceptions about Carpathians electroconductivity anomaly.....	315
7.5. Electric asthenosphere	316
Chapter 8. UKRAINIAN CARPATHIAN ISOSTASY	320
8.1. Potential of the topographic-isostatic masses	322
8.2. Isostatic models	323
8.3. Isostatic anomalies in Ukrainian Carpathian	328
Chapter 9. GEOMAGNETIC AND ELECTROMAGNETIC INVESTIGATIONS OF SEISMIC-TECTONIC PROCESSES IN THE CARPATHIANS REGION	337
9.1. Secular variations of geomagnetic field and its anomalies in the Carpathian region and adjusting territories.....	339
9.2. Local magnetic field dynamics investigations in the Carpathian geodynamic polygon	350
9.3. Long-period temporal variations of a local magnetic field on the Carpathian geodynamic polygon.....	354
9.4. Short-period local variations of an anomalous geomagnetic field in the Transcarpathian active seismic zone and their spatial-temporal relations with seismicity	359
9.5. Temporal variations of induction vectors and their interpretation in the Transcarpathian active seismic zone	365
9.6. Season and diurnal induction vectors variations in the Transcarpathians trough	377
CONCLUSIONS.....	384
LITERATURE.....	390
