

# CONTENTS

INTRODUCTION .....	9
<b>CHAPTER 1. SYNTHESIS OF NANOPARTICLES AND NANOSTRUCTURES OF METALS AND BIMETALS BY ELECTROLYSIS</b> .....	15
1.1. Matrix (template) synthesis .....	15
1.1.1. <i>Nanotemplate</i> .....	25
1.1.2. <i>Electrochemical fabrication of nanoparticles by template method</i> .....	22
1.1.3. <i>Specifics of electrochemical deposition of metals in nanotemplates</i> .....	27
1.2. Electrochemical deposition of nanoparticles on the surface .....	34
1.2.1. <i>Mono- and bimetal of Fe, Co, Ni nanoparticles</i> .....	44
1.2.2. <i>Mono and bimetallic of Cu nanoparticles</i> .....	54
1.2.3. <i>Mono and bimetallic of Ag nanoparticles</i> .....	57
1.2.4. <i>Mono and bimetal of Pt nanoparticles</i> .....	59
1.2.5. <i>Mono- and bimetallic of Au, Pd and Au-Pd nanoparticles</i> .....	60
1.3. Electrochemical synthesis of colloidal solutions of metal nanoparticles .....	64
1.3.1. <i>Cathodic reduction during electrolysis</i> .....	66
1.3.2. <i>Plasma electrolysis</i> .....	74
References .....	84
<b>CHAPTER 2. GALVANIC REPLACEMENT METHOD IN SYNTHESIS OF NANOSTRUCTURES AND MODIFICATION OF SURFACE</b> .....	102
2.1. Theoretical principles of galvanic replacement .....	103
2.2. Synthesis of nanostructures .....	113
2.2.1. <i>Hollow structures</i> .....	114
2.2.2. <i>Frame structures</i> .....	118
2.2.3. <i>The core@shell structures</i> .....	116
2.2.4. <i>Pore structures</i> .....	121
2.3. Modification of the surface .....	125
2.3.1. <i>Modification of the surface of metals</i> .....	125
2.3.2. <i>Modification of the semiconductors surface</i> .....	136
References .....	142

<b>CHAPTER 3. NANOCRYSTALLING COATINGS AND FILMS</b> .....	150
3.1. Monometallic coatings and films .....	151
3.1.1. <i>Influence of pulsed current on grain size of coatings</i> .....	152
3.1.2. <i>Influence of surfactants</i> .....	160
3.1.3. <i>Electrodeposition in non-aqueous medium</i> .....	162
3.1.4. <i>Properties of nanocrystalline coatings</i> .....	164
3.2. Coatings of alloys.....	169
3.2.1. <i>Binary alloys</i> .....	169
3.2.2. <i>Ternary alloys</i> .....	183
3.3. Metal nanocomposite coatings .....	188
3.3.1. <i>Specifics of codeposition of metal and the disperse phase</i> .....	189
3.3.2. <i>Mechanical properties</i> .....	195
3.3.3. <i>Corrosion resistance</i> .....	198
References .....	200
<b>CHAPTER 4. ELECTROCHEMICAL SYNTHESIS OF NANO-STRUCTURED COMPOSITES BASED ON POLYANILIN AND METALS</b> .....	212
4.1. Composite materials based on polyaniline and metals .....	212
4.2. Methods of synthesis of PAn/M or M/PAn nanocomposites .....	216
4.3. Electrochemical synthesis of PAn/M or M/PAn nanocomposites .....	223
4.3.1. <i>Nanocomposites of Ag/PAn</i> .....	223
4.3.2. <i>Nanocomposites of PAn/Ag</i> .....	227
4.3.3. <i>Nanocomposites of Au/PAn</i> .....	230
4.3.4. <i>Nanocomposites of PAn/Au</i> .....	232
4.3.5. <i>Nanocomposites of Pt/PAn</i> .....	244
4.3.6. <i>Nanocomposites of PAn/Pt</i> .....	249
4.3.7. <i>Nanocomposites of PAn/Pd</i> .....	253
4.4. Nanocomposites of PAn with nonnoble metals .....	260
4.4.1. <i>Nanocomposites of PAn/Ni</i> .....	260
4.4.2. <i>Nanocomposites of Ni/PAn</i> .....	261
4.4.3. <i>Nanocomposites of Cu/PAn</i> .....	264
4.5. Composites of polyaniline with binary and ternary metallic components.....	266
References .....	274
