|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| THE EDITORIAL BOARD                                                                                                                                                                                       | 7   |
| <i>Mocanu Larisa, Gonta Maria.</i> Catechol degradation in aqueous solutions by homogeneous processes                                                                                                     | 8   |
| <i>Gladchi Viorica, Lis Angela, Blonschi Vladislav, Bunduchi Elena.</i> Assessment of biodegradable organic pollution in the middle dniester river during 2015–2024                                       | 15  |
| <i>Lis Angela, Blonschi Vladislav, Gladchi Viorica, Bunduchi Elena.</i> Comparative study of photochemical transformations of vitamin B <sub>2</sub> and vitamin B <sub>9</sub> in natural surface waters | 26  |
| <i>Skyba Margarita, Skiba Yury, Danylo Kryachkov, Vorobyova Victoria.</i> Prospects of application of hydrophobic eutectic solvents for removal of pollutants of aquatic environment of various origin    | 33  |
| <i>Khilchevskyi Valentyn.</i> Characteristics of institutional water resource management in eastern European countries                                                                                    | 40  |
| <i>Oliinyk Nataliia, Tsurkan Oksana, Pogrebniy Anatoliy.</i> Sulfide mineral waters of the Carpathian region                                                                                              | 57  |
| <i>Mokienko Andrii.</i> Comprehensive analysis of chlorine dioxide as a disinfectant                                                                                                                      | 63  |
| <i>Streltsova Olena, Voliuvach Olha.</i> A scientific-based approach to solving the issue of wastewater treatment from surface-active surfactants                                                         | 71  |
| <i>Voliuvach Olha, Streltsova Olena.</i> Critical analysis of methods for removal of surface-active pollutants from aqueous solutions and wastewater                                                      | 78  |
| <i>Tseniukh Maksym, Sydor Taras, Orel Vadym.</i> Effect of using controlled pipe contraction in a short pressure pipeline                                                                                 | 86  |
| <i>Gushchuk Igor, Mokienko Andrii, Berezhna Alla.</i> Current problems of centralized water supply in Lviv region                                                                                         | 92  |
| <i>Poliakov Vadym.</i> On the engineering analysis of biofiltration                                                                                                                                       | 98  |
| <i>Pogrebniy Anatoliy, Rusakova Maria, Shuliakova Svitlana.</i> Microbiota of thermal waters of the Carpathian region of Ukraine                                                                          | 104 |
| <i>Cherniuk Volodymyr, Panevnyk Denys, Lytvyn Vitalii, Bihun Iryna.</i> Kinematics of restoration of Toms' effect in the flow of aqueous solutions of metaupon through a sharp narrowing of a pipe        | 112 |
| <i>Negoda Yurii.</i> Development of pilot hydrogeological models of the Western Bug river basin for assessing the stability of near-surface aquifer systems                                               | 123 |
| <i>Lozovitsky Pavlo.</i> Water quality of the Kamianka river of the Grove tide in Zhytomyr                                                                                                                | 133 |
| <i>Lozovitsky Pavlo.</i> Flows and ecological state of water of the tidal Tetereva – Gnylopyat river – Zhytomyr city                                                                                      | 150 |

|                                                                                                                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Sukhatskiy Yurii, Mnykh Roman, Sozanskyi Martyn, Znak Zenovii.</i> Pure and oxygen-doped graphitic carbon nitride for the sonocatalytic degradation of Direct Yellow 4 dye in aqueous medium                                                                          | 168 |
| <i>Kurylets Oksana, Makido Olena, Khovanets Halyna, Vasiichuk Viktor, Kazarina Olga.</i> Use of oxygen for fine treatment of wastewater from antibiotics in a heterogeneous Fenton system                                                                                | 174 |
| <i>Vasylechko Volodymyr, Olga Stashkiv, Lubomyr Shevchuk, Emiliya Slota, Svitlana Khalameida, Volodymyr Sydoruk, Oleksandr Gromyko, Svitlana Bagday, Vasyl Dyakiv, Nazar Manko, Victor Fedorenko, Rostyslav Stoika.</i> Transcarpathian clinoptilolite in water problems | 181 |
| <i>Oleksii Shevchenko, Anastasiia Kushnir.</i> Formation of groundwater resources on the "Solokiya" drainage system depending on water exchange conditions                                                                                                               | 197 |
| <i>Andrii Zavoiko, Yuliia Popadiuk, Ihor Popadiuk.</i> Wastewater treatment from organic matter and disinfection in waste stabilization ponds                                                                                                                            | 208 |
| <i>Yaremko Zinoviy, Bukliv Roksoliana, Helesh Andriy, Marchuk Iryna, Zasadna Veronika.</i> Features of the structure of water in salt solutions and the formation of their crystal hydrates                                                                              | 215 |
| <i>Andriy Helesh, Olha Rubay, Pavlo Zinko, Mykhailo Soltys, Yuriy Davydovych.</i> Treatment of wine-production wastewater using physical-chemical methods                                                                                                                | 221 |
| <i>Bazylyak Liliya, Zozulia Galyna, Kytsya Andriy, Skrypnychuk Vasyl, Kuntiyi Orest.</i> Bi- and polymetallic nanoparticles for water purification: the role of Ag, Cu and combined catalysts                                                                            | 228 |
| <i>Moroz Oleksandr, Mnykh Roman.</i> Application of hydrolyzed aluminum sulphates to intensify the process of purification of filtration waters from landfills                                                                                                           | 235 |
| <i>Matviiv Taras, Znak Zenovii.</i> Modification of clinoptylolite with iron(II) and iron(III) ions under the action of ultrasound radiation: physico-chemical aspects and prospective areas of application                                                              | 245 |
| <i>Matskiv Marian, Znak Zenovii.</i> Modification of clinoptylolite with copper oxide nanoparticles under the action of microwave electromagnetic and ultrasound radiation: synthesis, properties and practical significance                                             | 251 |
| <i>Hruzdieva Olena.</i> Integration of digital technologies into the water sector and the education system for future specialists                                                                                                                                        | 259 |
| <i>Chelyadyn Lubomyr, Rudy Vasyl, Slyuzar Andriy.</i> Ivano-Frankivsk leachate of the msw landfill. State, analysis, and treatment technology                                                                                                                            | 267 |
